DERMATECH

✓ Painless ✓ Affordable ✓ Reliable

With Truly Painless Hair Removal and Skin Rejuvenation, you can
take your business to the next level.

The future of IPL laser is here. Updated hardware and a sleek New
Design sets the KDT 750 apart from the rest.

When Innovation & Aesthetics Meet, **Kaloya** Appears!

Kaloya Dermatech Ltd, is a Canadian incorporated company that is revolutionizing the industry for hair removal and skin aesthetics, bringing inspiration and innovation to new and existing entrepreneurs. Its star innovative product, the KDT 750 IPL is unmatched in its hair removal and skin rejuvenation approach. It smartly offers multiple treatment modes and uses the most modern technology that IPL has to offer providing permanent and painless solutions. Earn millions of smiles of glowing consumers.

KDT 750 IPL holds great potential for new business ventures which is owed to its superb features and major marketing support.

Kaloya Dermatech's technical edge, valuable training system, and trustworthy guidance are great assets that our business partners find extremely valuable.

KDT 750 New Painless IPL technology

The KDT 750 is designed with the customer in mind. We created a unique machine that offers multiple treatment types so you can satisfy your customers needs and expand your business.

Our HEALTH CANADA LICENSED machines are made to achieve better results at a faster rate than the traditional IPL machine.

Our larger spot size and increased shots per second combined with our enhanced New painless technology lets you quickly finish treatments with no patient discomfort and no downtime.

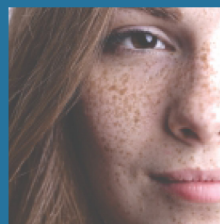

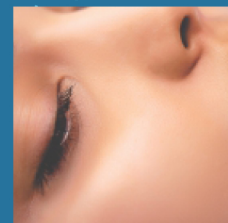

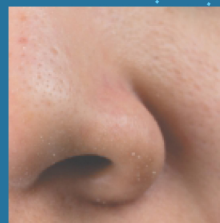

The SR Handle

Photo Skin Rejuvenation is the most modern application of Laser Technology for successful treatment of large pores, skin lifting toning, facial lines by regenerating collagen. KDT 750 IPL treatment also gives powerful results in deep pigmentation, acne scars, sun damage and age spots by eliminating lesions on the dermis layer by 530-1200nm with intense energy.

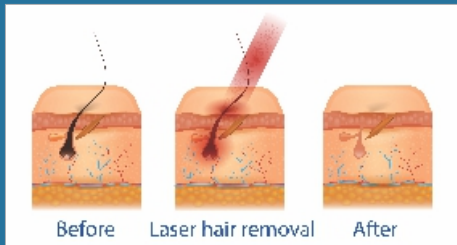

Treats & Removes Multiple Treatment Options

- ✓ Hair Removal
- ✓ Folliculitis (Ingrown Hair)
- ✓ Collagen Stimulation
- ✓ Epidermal Melasma
- ✓ Broken Capillaries
- ✓ Pigmentation
- ✓ Facial Fine Lines & Wrinkles
- ✓ Age Spots
- ✓ Rosacea
- ✓ Freckles
- ✓ Acne & Acne Scars
- ✓ Skin Tightening
- ✓ Spider Veins
- ✓ Red Vascular Veins
- ✓ Brown Spots
- ✓ Sun Damaged Skin

The HR Handle

To meet various hair types and their diverse needs, KDT 750 offers a more safe, fast and accurate performance. Intuitive user friendly display, largest spot size, highly efficient cooling system and exact energy controlled technique-perfectly provides the desired results with 610-1200nm range of energy.

Training Certification Included

Kaloya DermaTech offers the KDT-750 to ensure safety and effectiveness. Our Trainers will help clients professionally enter the laser industry. Our hands on approach provides new start-ups with business and marketing advice. Kaloya DermaTech leaves you with the confidence to successfully treat your clients and grow your cosmetic laser practice

Owner and Patient Satisfaction

KDT-750's features allow you, as the owner, to reduce cost by decreasing the amount of time it takes for each treatment without decreasing the price of the treatment. It will also save the patient money and time as it takes a smaller amount of treatment to achieve results compared to other IPL machines. This allows you as the business owner to strengthen customer relations and keep them coming back for other services.

Other benefits include:

- ✦ 300,000 shots on each handle
- ✦ Low maintenance
- ✦ Minimum consumables

**New Painless Treatment
High Cooling System
No Downtime
1 Year Warranty**

Satisfied patients have benefitted from:

- ✦ Versatile Treatment options
- ✦ Minimal patient discomfort
- ✦ Minimal downtime post procedure

This product Authorized by **Health Canada** for sale

Advantages

Technology	FEE (Fluence Emitted Equality) Technology	Available	Makes sure the energy output is accurate and the same as the display which makes the operation safe and easy.
Operation	Operation Way	Stationary Operation and Motion Operation	Only uses 1/3 rd of the time it takes to do treatment of the arms, legs and back compared to the traditional IPL machine. The KDT 750 makes the treatment process much easier and faster.
Parameter	Wavelength Frequency	530-1200nm for SR 610-1200nm for HR	Filtered violet light and infrared light can absorb much less water from the skin compared to other machines. Less water absorption results in a painless, more comfortable treatment.
	Energy	1-12J/cm ² for SR 1-7J/cm ² for HR	Intense Pulsed Light is the use of intense pulses of non-coherent light over a range of wavelengths from 530nm to 1200nm. Cooling is used to protect the skin in contact with the device.
	Timer	1s, 3s, 12s for SR 1s, 3s, 30s for HR	Shot timer allows for a dramatic decrease in the time it takes to complete a treatment and increases efficiency accordingly.
Function	Self-monitor Function	Available	Shows all connected points on the display and monitors them all the time. Simply, the process of calibrating energy, saves time and is more convenient than other IPL machines. Make sure the water circulation is working and prolong the life span of the xenon lamp. Simply the process of calibrating energy, saving time, more convenient than the traditional IPL machine. Monitor the charging situation in-scene, ensure the energy of each shoot is standard. Keep the treatment safe and effective.
		Self-Checking function	
		In-scene monitor function Water Temperature Water Flow Sensor Water Level Sensor
